---

## Recommended Citation

Attis, David, "Redefining the Academic Library: Managing the Migration to Digital Information Services" (2013). *Looking Forward: Re-Imagining the Academic Library's Role in Teaching, Learning & Research*. Paper 1.  
<http://digitalcommons.mcmaster.ca/lookingforward/1>

This Presentation is brought to you for free and open access by the Events & Conferences at DigitalCommons@McMaster. It has been accepted for inclusion in Looking Forward: Re-Imagining the Academic Library's Role in Teaching, Learning & Research by an authorized administrator of DigitalCommons@McMaster. For more information, please contact [scom@mcmaster.ca](mailto:scom@mcmaster.ca).

# **Redefining the Academic Library**

---

## Managing the Migration to Digital Information Services

*McMaster University*  
*March 1, 2013*

# Writing Our Own Obituary

*Library Professionals Themselves See Abrupt End to Traditional Models*

*"A community of Associate University Librarians and Assistant Library Deans challenging the traditional boundaries in libraries"*

**By 2015...**

## **Patrons Go Elsewhere for Information**

"Our users will meet more than 90% of their information needs from sources that are not directly connected to the library."

## **No Need for Traditional Librarians**

"Successful libraries will be those that have managed to turn over the majority of their staff or reassigned staff to different roles within the library."

## **A Space for More Than Just Books**

"Most library space will be taken over by functions that have nothing to do with library collections or services."

# This Time It's Different

*Transformation of the Academic Library Likely to Happen on Your Watch*

## The Four Horsemen of the Library Apocalypse

**Unsustainable  
Costs**

**Viable  
Alternatives**

**Declining  
Usage**

**New Patron  
Demands**

# Journal Costs Crowding Out Books

## Serials Costs Rising Faster Than Library Budgets

### Expenditures in ARL Libraries

Median Values for 124 ARL Members,  
Unadjusted Millions of Dollars

Median Shares of Total Library Budget for  
124 ARL Members

# Are Rising Journal Costs Justified?

## *Librarians and Publishers Increasingly at Odds*

### **Librarians Bemoan Predatory Pricing**

- Prices outpacing inflation
- Bundled deals limit ability to cancel titles
- Risk losing access to back catalog
- Publisher owns copyright
- Costs would be lower in a non-profit model
- “Our faculty did the research, why should we have to pay so much to access their work?”

**Prescription:**  
*Support open access journals*

### **Publishers Point to Explosion in Scholarly Output**

- Research output has increased significantly
- Cost per download has actually gone down
- Bundles give institutions wider access at a discount
- Transition to e-journals required massive investment in new infrastructure
- “We are willing to try open access models as long as we can continue to cover our costs.”

**Prescription:**  
*Find new sources of funding*

# Scale Beyond Imagining

*Fastest Growth, Broadest Access Now Outside of Academic Libraries*

# The Thousand Year Plan

## *Why Academic Libraries Will Never Beat Google*

Estimated time to scan all  
of their 7 M volumes

1,000 years

Actual time for Google to  
scan 7 M volumes

6 years

### A Devil's Bargain?

“The prospect of mounting a book-digitization project at the scale of Google’s never seemed within the capabilities of research libraries until an outside partner with seemingly limitless resources emerged. But this outside partner has often seemed more focused on its commercial interests than on meeting scholarly needs.”

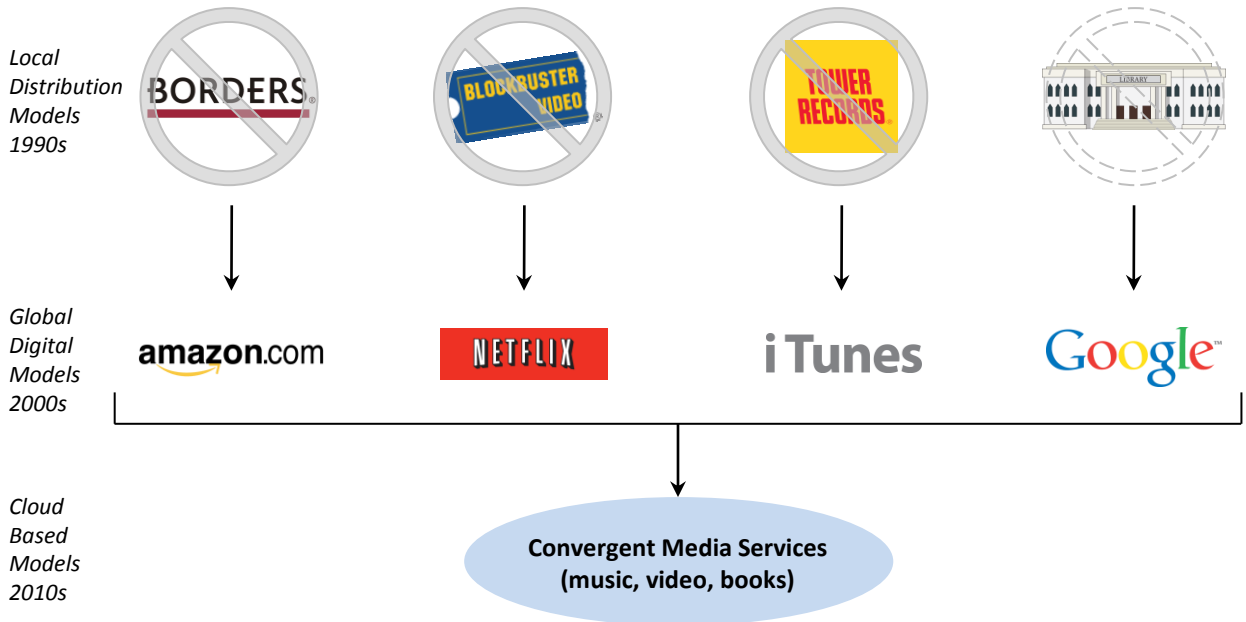

*Roger Schonfeld  
ITHAKA S+R*

# With Us or Without Us

*Many Predict Libraries Will Be the Next Media Outlet to Be Disintermediated*

**Local Physical Distribution Models Displaced  
by Remote and Fully Digital Approaches**

### Even Librarians Concede

“The new consumer utopia of instantly available digital books is leaving the library behind as a relic of a bygone age when users were not self-sufficient and when the information or book a user wanted was not simply a click away.”

*Dennis Dillon, Associate Director for Research Services  
University of Texas at Austin Libraries*

# Patrons Switching Faster Than Libraries

*Faculty and Students Already Looking Elsewhere for Search Help*

## Where Do Students Start a Search?

n = 2,229

## Where Do Faculty Start Their Research?

n = 3,025

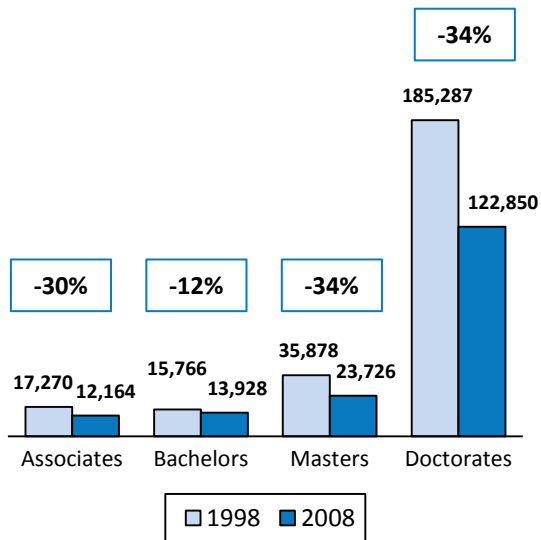

□ 2003 ■ 2009

# The Lonely Reference Librarian

*Circulation and Reference Requests Down Across All Institutional Types*

## Declining Circulation

*Average General Collection Circulation*

## Declining Reference Requests

*Average Weekly Reference Requests*

# The Library as a Social Learning Space

## *New Libraries Support a Range of Academic Activities*

### Taylor Family Digital Library – University of Calgary

### Combining Scholarly Resources, Technology, and Community Space

- 6 stories, 24,000 square metres
- High-Density Library (HDL) built off campus to store books, journals
- Features 200 computer stations, video editing suites, touch technology, a gaming area, and an HD video “wall”
- Learning Commons with café
- One electrical outlet per seat
- Total cost: \$206 M

# From Ownership to Access

## *Reducing Reliance on the Local Print Collection*

### Current State

- Large collections of physical books in open stacks with low circulation
- Duplicate book holdings at the institutional, system, consortial and regional level
- Books purchased prospectively “just in case” a patron might need them in the future

**Books**

### Preferred End State

- Ebook catalogs larger than previous physical collection
- Physical books preserved (and accessible) through collections shared across consortia and stored offsite
- Ebooks purchased only when patrons use them (patron-driven acquisition)

### Barriers to Change

- Copyright prevents access to orphan works and scanned material
- Ebook versions of academic monographs not yet universally available
- Ebook procurement more complicated than traditional purchasing
- Current DRM restrictions limit how patrons can use ebooks

# The Ebook Tipping Point

*With Commercial Take Off, Can Academic Ebooks Be Far Behind?*

## Ebooks Sales on Amazon

amazon.com

**July 2010**  
Ebooks outsell  
new hardcovers

**Nov 2007**  
Kindle eReader  
launched

**April 2011**  
Ebooks outsell  
all print books

## Ebooks as a Percentage of Academic Library Acquisition Budget

*Survey of 136 Colleges and Universities*

# The Promise of the Cloud

## *Leveraging Ebooks and Shared Repositories to Reduce Local Holdings*

### **HathiTrust Offers Collaborative Digital Library for the Academy**

- Began in 2008 to establish a collaborative repository for digitized collections
- Now involves 52 partner libraries
- Includes both in-copyright and public domain materials digitized by Google and others
- Bibliographic and full-text search are available for all volumes
- Public domain volumes are freely accessible to the public and can be downloaded with authentication by affiliated users

### **Scaled, Digital Collections Will Free Up Significant Local Resources**

- Nearly 1/3rd of content purchased by US research libraries has already been digitized and preserved in HathiTrust
- More than 60% of retrospective print collections held in ARL libraries will be duplicated in HathiTrust by June 2014
- Potential median space savings at ARL libraries of more than 45,000 assignable square feet (ASF).
- Possible annual cost avoidance between \$500,000 and \$2 M per ARL library

# Copyright Law Biggest Obstacle to Widespread Access

## Google Books Legal Setback Temporarily Derails Prospects for Massive Digital Text Distribution

### Original Settlement

*November 2008*

- Google paid authors, lawyers, and publishers \$90 M for rights infringements
- Google continues to digitize books on an “opt-out” basis
- Orphan works included, with \$35 M fund for “Book Rights Registry” to compensate claimants

### Settlement Rejected

*March 2011*

- Court ruled that Google holds unfair monopoly over digitized works
- “Opt out” system contradicts purpose of copyright
- Back to the drawing board... and an opening for HathiTrust and others

# “Fair Use” in a Digital Age

## *Electronic Formats Forcing a Showdown Over Usage Rights*

### Can I share this content with my students?

#### Course Reserves at Georgia State University

- Four administrators sued by Cambridge and Oxford University Presses and SAGE
- Plaintiffs asking for additional licensing fees for e-reserves, strict word limits on copies
- Supported by Association of American Publishers and Copyright Clearance Center
- GSU found to have violated copyright in only 5 of 99 instances in May 2012– publishers are appealing decision

#### Unrest Over Access Copyright Tariffs

- Canada’s *Access Copyright* announced significant fee increases and rules on usage monitoring for licensed materials
- Could quadruple annual fee payments at colleges and universities
- Ultimately, about 15 institutions said explicitly that they would opt out of *Access Copyright*

### Can we scan and share orphaned works?

#### Authors Guild Sues HathiTrust

- Plaintiffs allege unauthorized digitization, worry about data security and piracy
- HathiTrust promises due diligence in investigating and freeing orphaned works
- Librarians ask: Who benefits from “locked” scholarly literature?
- Court rules in favor of HathiTrust in October 2012

# Refining the Purchasing Algorithm

## Triggers, Limits, and Mediation Standards

- Titles loaded into catalog

- Avoid paying for brief browsing

Most users spend only 5 to 15 minutes in a book, and few books are used more than 3 times

- Books used more than 3 times are more likely to be widely popular

- *Increased to 5 uses after analysis of savings threshold*

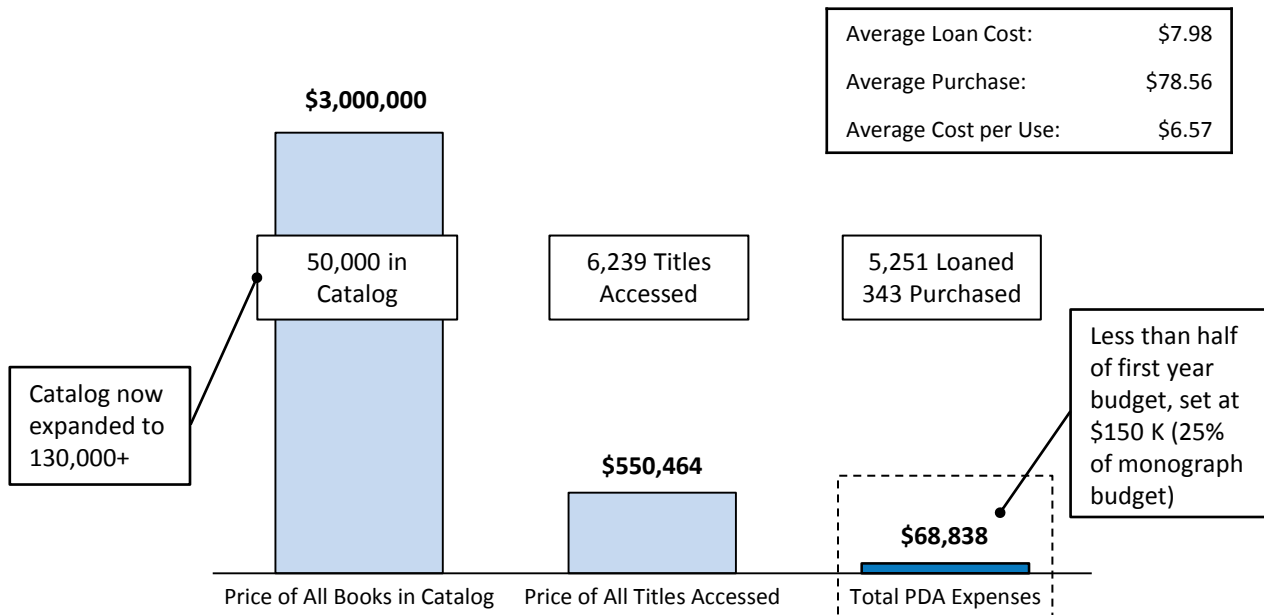

- Avoid overly expensive purchases

- *Removed limit and mediation; cost savings not worth delay / oversight*

- “Non-Linear Lending” allows unlimited simultaneous access to all ebooks

# Expansive Access at Fractional Cost

## Significant Savings Compared to Traditional Acquisition or Inter-Library Loan

# Moving Beyond the “Big Deal”

## *Creating a Broader Range of Options for Scholarly Communication*

### Current State

- Researchers transfer copyright to journal publishers
- Disciplinary societies contract with publishers for journal production
- Publishers sell access to libraries in bundles of journal titles
- Gaps in subscriptions filled by inefficient and expensive inter-library loan programs

**Journals**

### Preferred End State

- Authors retain certain aspects of copyright and deposit copies of articles in open access repositories
- Subscription model coexists with on-demand services and open access models
- Researchers have outlets for making data accessible, sharing pre-prints, and publishing non-article forms of scholarship

### Barriers to Change

- Faculty tenure and promotion guidelines favor publication in selective journals (typically produced by a handful of publishers)
- Publishers hesitant to adopt open access models that threaten their financial viability

# Pressure Mounting to Change the System

## Gathering Calls for Lower Prices and Open Access

*June 8, 2010*

### U of California Stands Up to Nature Group

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

- Nature proposed 400% increase in total license costs
- UC System threatened suspension of 67 subscriptions
- Eventually agreed to negotiate

*March 21, 2011*

### Cornell Bans Non-Disclosure Agreements

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

- ARL urged members to avoid NDAs in June 2009
- Publishers increasingly agreeing to drop NDAs
- Cornell promoted publishers with favorable terms

*January 30, 2012*

### Elsevier Publishing Boycott Gathers Steam Among Academics

\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

- 1,900 scientists have signed up, pledging not to publish, referee, or do editorial work for any Elsevier journal
- Protesting high prices, bundling of journals, and Elsevier's support for the Research Works Act

Sources: Jennifer Howard, "U. of California Tries Just Saying No to Rising Journal Costs," The Chronicle of Higher Education, June 8, 2010; Jennifer Howard, "Cornell U. Library Takes a Stand With Journal Vendors: Prices Will Be Made Public," The Chronicle of Higher Education, March 21, 2011; Josh Fischman, "Elsevier Publishing Boycott Gathers Steam Among Academics," The Chronicle of Higher Education, January 30, 2012.

# Subsidizing Accessibility

## Four Ways to Unilaterally Encourage Open Access

- Modeled on *Compact for Open-Access Publishing Equity* (COPE)
- Any UF faculty, post-doc, student, or staff can apply
- Up to \$3,000 in fee support
- Must be published in open access journal

### Open Access Fee Subsidy

- KU “ScholarWorks” hosts faculty e-prints and data
- Available freely worldwide, Google-friendly (stable URL)
- Allows tracking of output, access, readership
- Can negotiate with publishers for faculty backfiles

### Institutional Repository

- ArXiv hosted by Cornell library, home to hard science e-prints
- OpenFolklore hosted by Indiana U. library, home to free folklore journals
- A model platform for future scholarly communication?

### Disciplinary Repository

### Open Textbook Pilot

- 2009 Florida legislation spurred open textbook taskforce
- Introductory calculus textbook commissioned by provost
- Free to download, \$35 for print
- Study suggested faculty worried about quality, recognition

arXiv.org

Open Folklore

# Opening the Floodgates

*Digitization Transformed the Music Industry in Less Than a Decade*

## Digital Music Purchase Options

Ad Supported	Subscription
 	 
 	   napster. (1999-2001)
Pay-per-Song	Free

## Lessons from the Music Industry

- **Long tail thrives:** Consumers have broader access and more purchase options
- **Every musician a producer:** Musicians have more options for distributing their work
- **More music, less revenue:** Total revenues from sales of CDs, vinyl, cassettes and digital downloads in the U.S. peaked at \$14.6 B in 1999, may fall as low as \$9.2 B
- **Adapt or die:** Record companies and music retailers have struggled to adapt
- **Music wants to be free:** Digital Rights Management (DRM) restrictions largely abandoned after 2007

# The Most Valuable Space on Campus

## *Converting Library Space to Meet Patron Needs*

### Current State

- Most library space taken up by physical books and journals in open stacks
- Typically 50% of volumes have never circulated (some institutions as many as 80%)

Space

### Preferred End State

- Ebooks and e-journals provide instant access to needed resources
- Physical volumes are removed when possible to free up space for collaborative learning and other activities
- Other academic support services (e.g., teaching and learning centers) move into the library space

### Barriers to Change

- Ebooks and discovery tools not yet an acceptable substitute for browsing open stacks
- Vocal groups of faculty strongly oppose reducing onsite physical collection
- Deselecting books and journals can be expensive and time-consuming
- Often expensive to renovate libraries to accommodate new uses

# A Long Tail in the Stacks

*Most Volumes Rarely Circulate, If Ever*

## *A long-known problem*

**University of Pittsburgh**  
*"Use of Library Materials"*  
 1979

- 40% of collection never circulated
- If a book did not circulate during first 6 years, chances of it ever circulating were 1 in 50

## *Now even worse*

**Cornell University**  
*"Task Force on Print Collection Usage"*  
 2010

- 55% of books purchased since 1990 have never circulated
- 65% of books purchased in 2001 had not circulated by the end of 2009

**13%**

Average annual circulation rate from open stacks

**1-2%**

Average annual circulation rate from high-density storage

Source: Allen Kent et al., "Use of Library Materials: The University of Pittsburgh Study," Marcel Dekker, 1979; "Report of the Collection Development Executive Committee Task Force on Print Collection Usage," Cornell University Library, 2010; Paul Courant, "On the Cost of Keeping a Book," *The Idea of Order*, CLIR, 2010; Lizanne Payne, "Library Storage Facilities and the Future of Print Collections in North America," OCLC, 2007.

# The Price of “Just-in-Case” Collections

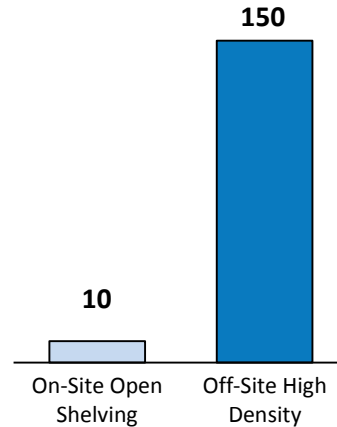

## *Attachment to Open Stacks Comes With Significant Costs*

### The Cost of Keeping a Book

*Yearly Cost per Volume*

*Books per Square Foot*

Source: Courant, Paul and Matthew Nielsen, “On the Cost of Keeping a Book”, *The Idea of Order: Transforming Research Collections for 21<sup>st</sup> Century Scholarship*. CLIR Pub#147. June 2010; Education Advisory Board interviews and analysis.

# Sharing the Burden of Print Storage

## *Economies of Scale in Multi-Institutional Repositories*

### **The Research Collections and Preservation Consortium (ReCAP)**

- Print storage facility shared by Princeton, Columbia, and New York Public Library
- Holds up to 10 M volumes
- Stores books, journals, and other items
- Preserves, loans, and provides electronic document delivery

### **The Western Regional Storage Trust (WEST)**

- Distributed print repository program for journal backfiles
- 20 libraries and library consortia, led by UC System
- Currently in planning phase
- Grant from Mellon Foundation

### **Ensuring All Titles Are Preserved Somewhere**

#### *Center for Research Libraries – Print Archives Preservation Registry*

- Global database of all print serial holdings and preservation programs
- Opened August 2012
- Current database describes 25 storage initiatives throughout North America
- Working with California Digital Library

# Collecting in Concert

## Avoiding “Re-Duplication” Through Coordinated Specialization

### Institutions Specialize Collections in Unique Subjects

- Southern Literature
- Religious studies
- Dance
- 16<sup>th</sup> and 17<sup>th</sup> Century microforms

THE UNIVERSITY  
of NORTH CAROLINA  
at CHAPEL HILL

- North Carolina history
- Language and linguistics
- Folklore
- 18<sup>th</sup> Century microforms

### NC STATE UNIVERSITY

- Patents and trademarks
- Architecture
- Agriculture
- Textiles

### 71% of Titles Held Uniquely

*TRLN Overlap Study, 2006*

**TRLN** ▲

TRIANGLE RESEARCH LIBRARIES NETWORK

# Repurposing the Warehouse

## *Top Trends in Next-Generation Library Space Planning*

Fewer physical resources

Wireless connectivity  
and outlet access

Comfort and collaboration

Integration of academic  
support services

Flexibility and modularity

Food and drink

# Coming Out from Behind the Desk

## *Library Staff Engaging Directly with Student and Faculty Needs*

### Current State

- Significant staff time devoted to cataloging and processing physical books and journals
- Declining utilization of circulation and reference services

### Staffing

### Preferred End State

- Librarians embedded in online courses, departments, and research teams
- Specialized staff lead campus efforts in academic technology, e-science, and digital information resources

### Barriers to Change

- Some librarians lack skills, interest in providing new support services
- Faculty do not always see librarians as a useful resource for teaching and research support

# Going Where the Students Are

## *Embedded eBrarians Integrated into Online Courses*

*Bucks County Community College*

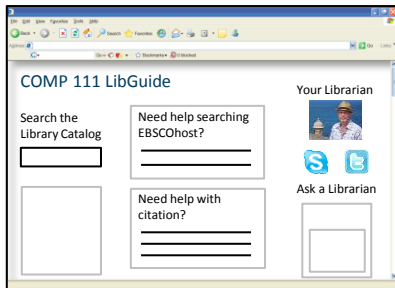

Librarians  
participate in  
online chat and  
discussions

The screenshot shows a web browser window displaying the 'My Online Campus' page for the course 'COMP 111 (Fall Semester 2010)'. The page has a blue header with the Bucks County Community College logo and the text 'My Online Campus'. Below the header, the course title 'COMP 111 (Fall Semester 2010)' is displayed. The main content area is titled 'English Composition II – Dr. Urdike'. On the left side, there is a vertical navigation menu with the following items: Announcements, Assessments, Assignments, Calendar, Chat, Discussions, Learning Modules, Mail, Roster, Search, and Web Links. The 'Chat' and 'Discussions' items are highlighted in blue. In the main content area, there are five buttons: 'Start Here', 'Course Work', 'Resources', 'Library Research Guide', and 'Survey'. The 'Library Research Guide' button is highlighted with a black border. Below the buttons, there is a text block that reads: 'This guide has everything you need to start your research for course assignments and the final essay.'

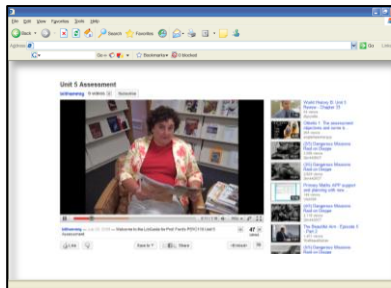

# Leveraging High-Traffic Web Venues for Course Support

## LibGuides

## Video Tutorials

iTunes U

# Where the Action Is

## *Embedded Subject Specialists Bring Research Help On Demand*

### Traditional Librarians Underutilized and Based in Central Library

- Few students or faculty visit building for research needs
- Librarians increasingly disconnected with patrons
- Vast majority of medical research stored and accessed virtually

### Clinical Faculty and Students Struggle to Process Expansive Research Output

- Lengthy research reviews made more difficult by rapidly expanding scholarly output
- Need for instant electronic access and expert guidance

### “Informationists” Embedded in Departments Meet Student and Faculty Research Needs

- 10 library specialists in program
- Sit in on departmental meetings and answer questions
- Conduct systematic literature reviews for grant proposals and articles

# Starting from Scratch

## *Building an Academic Library Based on Future Needs Rather than Past Precedent*

### **Minimal Physical Collection**

- 93 K print books
- 632 K digital books
- 56 K digitized journals

### **Outsourced Technical Services**

- Use YBP Library Services
- Receive shelf-ready books that are already cataloged and labeled
- Sends gift book to OCLC for cataloging

### **Large Collaborative Collection**

- Rapid access to 36 M physical books and 1.7 M digitized books held in UC libraries
- CDL handles licensing e-resources

### **Virtual Reference**

- No reference desk
- Outsourced reference service through phone, e-mail, chat, workshops

### **Patron-Driven Acquisition**

- Most purchases selected by patrons
- No subject librarians on staff

### **Automated Circulation**

- Self-checkout
- RFID tags on all books

# A Path Toward the Future

## *Defining and Overcoming Barriers to a Preferred End State*
