

Discovering Journals and Books 2015

Thank you

Thank you for agreeing to participate in our survey which aims to help inform researchers, libraries and publishers about how readers find and access online journals and books. The survey is being carried out by Simon Inger and Tracy Gardner, consultants to the scholarly publishing community.

This survey follows on from work undertaken in 2005, 2008 and 2012 and will allow us to report the trends in reader behaviour. The survey findings will once again be made freely available. If you would like to read the free 2012 report, a link to it will be given at the end of the survey.

We know your time is precious and so this survey is designed to take you no more than 9 minutes to complete. All your responses are given anonymously.

At the end of the survey you will be redirected to a separate site where you can optionally enter our prize draw for the chance to win one of three \$100 Amazon vouchers and optionally elect to receive by email a copy of the findings of this survey.

This survey has been kindly supported by the following organisations and you will have been invited to take this survey by one or more of them:
